

## Does the IT sector have similar revenue levels than the Financials section in Year 4?

Total Revenue for IT Sector for Year 4

Total Revenue for Financials Sector for Year 4

- The above charts are the histograms for the annual Total Revenue for IT and Financials sector companies reported for all companies in Year 4
- Both distributions are right-skewed (positively skewed), which means the mean for each is higher than the median
- The **mean** for IT is about \$16 billion, and for Financials is about \$20.6 billion. It looks like Financials companies have a higher Total Revenue on average than IT companies. However, the **median** for Financials is double (\$10.3 billion) the **median** for IT (\$5.6 billion).
- The **standard deviation** for IT is larger (\$33 billion for IT and \$25.6 billion for Financials companies). That means, the variability in Total Revenue for IT companies is higher, with a company having total revenue above \$81 billion. Also, the range for IT is \$214.6 billion, which is twice as high as Financials companies' range (\$91.7 billion)
